Subject: Re:Dimock Data

Hmmm, Well she said she would have more info about that. Have your guys made any interpretation about the source of the gas? (A researcher I talked to said it's isotopic characteristics show that it is Marcellus shale gas.) Mark

Mark -

Picking your inquiry on Dimock data up for Terri in R3. The isotopic data is online below:

<http://www.epa.gov/reg3hwmd/npl/PAN000306785.htm>

We didn't interpret this data but shared with our office of research and development for use in its HF study.

Do you need anything else re: Dimock?

Thanks,

David - alt_body.html
